ENDOSCOPY CENTER OF WESTERN NEW YORK

Endoscopy Center of Western New York, LLC (ECWNY) operates a single-specialty (gastroenterology) freestanding ambulatory surgery center (FASC) located at 60 Maple Road, Williamsville (Erie County), New York 14221 (the Center). ECWNY is submitting this Full Review Certificate of Need (C.O.N.) Application seeking approval to:

1. Certify and construct a single-specialty (gastroenterology) extension clinic of the Center to be located at 250 Windward Road, Suite 140, Orchard Park (Erie County), New York 14127; and
2. Change the Center's ownership and create two (2) ownership divisions within the Center.

The Extension Clinic

The Center has five (5) procedure rooms at its main site in Williamsville, New York (the Maple Road Division). The Center is seeking to certify and construct an extension clinic to be located at 250 Windward Road, Suite 140, Orchard Park (Erie County), New York 14127. The extension clinic will have three (3) procedure rooms and will be named Endoscopy Center of Western New York – Orchard Park and will be identified as the Center's Southtowns Division. The extension clinic will provide gastroenterological surgical services to its patients and will be certified as a single-specialty (gastroenterology) FASC extension clinic.

Christopher J. Bartolone, M.D., an existing member of the Center and the existing Medical Director of the Center, will be the Medical Director for the Maple Road Division and the Southtowns Division. The Southtowns Division will have a Transfer and Affiliation Agreement for backup and emergency services with South Buffalo Mercy Hospital, which is located 6.1 miles and 12 minutes' travel time from the extension clinic.

The Ownership Transfer

The Center currently has two (2) members, as follows: 60 Holdco, LLC (60 Holdco; 60.93%); and PE Healthcare Associates, LLC (PEHA; 39.07%). The Center is seeking approval to change the Center's ownership, as follows:

1. Transfer ownership units from PEHA to 60 Holdco;
2. Add three (3) new individual members to 60 Holdco; and
3. Create two (2) ownership divisions within the Center: the Maple Road Division and the Southtowns Division.

Overall, as a result of this project, the Center will continue to be owned by two (2) members, as follows: 60 Holdco (71.965%); and PEHA (28.035%).

This application includes a Health Equity Impact Assessment (HEIA) because it involves a change of ownership, and certain surgeons and procedures are relocating from the Center's existing main site to the proposed extension clinic. As explained in the HEIA, this project responds to and addresses a significant decline in accessible gastroenterology services in Erie County in recent years resulting from the closure of Lakeshore Medical Center, the discontinuation of gastroenterology services at Dunkirk Hospital, the closure of a competing practice and the retirement and death of several local gastroenterologists.

5. Date the Health Equity Impact Assessment (HEIA) started	February 13, 2024
6. Date the HEIA concluded	April 16, 2024
7. Executive summary of project (250 words max)	
<p>Through this project, SCA Health is looking to continue a partnership with the practice group Gastroenterology Associates, LLP by jointly opening a second site of service. This second site of service will serve as an extension of the partnership's existing ambulatory surgery center, Endoscopy Center of Western New York, LLC ("ECWNY") in Williamsville, NY. The new site, to be named the Endoscopy Center of Western New York, LLC with its Orchard Park, NY address ("ECWNY-OP" or the "Center"), will be in the Orchard Park, NY area south of downtown Buffalo. The need for a new ASC is primarily driven by population growth in the service area coupled with patient demand. ECWNY-OP will be exclusively providing gastrointestinal ("GI") procedures. Projections indicate that upon full transition and stabilization of the new volume, the Center is expected to perform more than 9,000 surgical GI cases annually.</p>	
8. Executive summary of HEIA findings (500 words max)	
<p>ECWNY is establishing a new ambulatory surgery center in Orchard Park, which is aimed at providing essential gastrointestinal (GI) services in the Buffalo region and the Southern Tier of New York State. The initiative responds to a significant decline in accessible GI services in recent years resulting from the closure of Lakeshore Medical Center, the discontinuation of GI services at Dunkirk Hospital, the closure of a competing GI practice in 2017, and the retirement and death of several GI physicians in the area.</p> <p>Once fully operational, the Applicant expects that the Center will conduct over 9,000 surgical GI cases annually, significantly reducing the burden on emergency rooms and hospitals. The Applicant commits to serving all individuals in need of endoscopic services without discrimination based on age, race, creed, national origin, religion, sex, sexual orientation, marital status, disability, or payment source.</p> <p>By focusing its services on the communities immediately surrounding the new location, the Applicant will actively promote awareness among local physicians and residents to address the unmet healthcare needs that initially led to its establishment. To enhance accessibility, particularly for traditionally underserved populations, the</p>	

Center will provide culturally sensitive care, offer assistance for language and physical barriers, and prioritize patient feedback for continual quality improvement.

Community stakeholders, including healthcare providers and the Erie County Department of Health, have expressed unanimous support for the project, recognizing its potential benefits to the community and healthcare system.

The underserved populations identified in the HEIA are low-income people, racial and ethnic minorities, immigrants, older adults, persons living in rural areas, people who are eligible for or receive public health benefits, and people who do not have third party health coverage or have inadequate third-party health coverage.

Moving forward, we recommend that the Applicant implement targeted outreach initiatives and foster partnerships with stakeholders in underserved communities. By prioritizing accessibility and inclusivity, the Center will increase equitable access to high-quality GI services for all residents, regardless of socio-economic status or background.

SECTION B: ASSESSMENT

For all questions in Section B, please include sources, data, and information referenced whenever possible. If the Independent Entity determines a question is not applicable to the project, write N/A and provide justification.

STEP 1 – SCOPING

1. **Demographics of service area:** Complete the “Scoping Table Sheets 1 and 2” in the document “HEIA Data Tables”. Refer to the Instructions for more guidance about what each Scoping Table Sheet requires.

Please refer to attached spreadsheet, entitled “HEIA Data Tables_ECWNY.xlsx”.

2. **Medically underserved groups in the service area:** Please select the medically underserved groups in the service area that will be impacted by the project:

- Low-income people
- Racial and ethnic minorities
- Immigrants
- Older adults
- Persons living in rural areas
- People who are eligible for or receive public health benefits

People who do not have third-party health coverage or have inadequate third-party health coverage

3. For each medically underserved group (identified above), what source of information was used to determine the group would be impacted? What information or data was difficult to access or compile for the completion of the Health Equity Impact Assessment?

Sources of data include census data, claims data provided by the Applicant, Ambulatory Surgical Center Quality Measures data released by the federal Centers for Medicare and Medicaid Services, information obtained from the federal Uniform Data System (UDS) mapper, and qualitative data obtained from leadership interviews, stakeholder interviews, and community surveys.

For the purposes of this HEIA, the service area has been defined as Erie County, which includes the cities of Cheektowaga, Buffalo, West Seneca, Amherst, Williamsville, Buffalo, Blasdell, Lackawanna, West Seneca, Springville, Orchard Park, Lancaster, Lake View, Holland, Hamburg, Elma, Eden, East Aurora, Derby, Depew, and Angola.

4. How does the project impact the unique health needs or quality of life of each medically underserved group (identified above)?

Unless otherwise noted, the data outlined below was obtained from the US Census American Community Survey 2022.

Older Adults

The Center's service area includes, on average, individuals who are significantly older than the statewide average, with a higher median age and a higher percentage of the population 65 and over. Endoscopic services are traditionally utilized by individuals 40 years and older¹.

To what extent are the medically underserved groups (identified above) expected to use the service(s) or care impacted by or as a result of the project?

Unless otherwise noted, the data outlined below was provided by the Applicant and reflects its current operations at its existing site located further north in Erie County. The new site, in Orchard Park, will create improved access to these services for individuals living in southern Erie County, as well as those living further south in Western New York State.

Older Adults:

The graph below summarizes the age of patients seen by the Applicant. The Applicant serves a higher proportion of individuals 65 and over in the data compared to the statewide average.

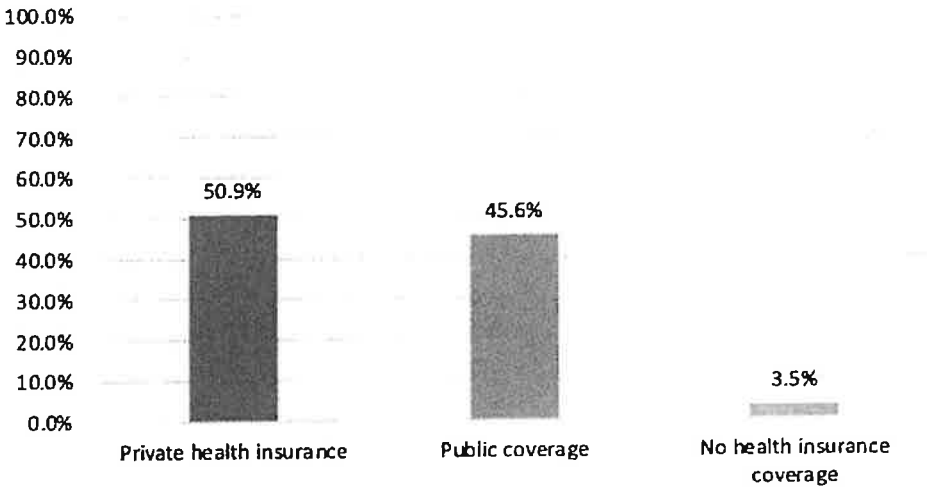

⁸ Includes Medicare and Medicaid.

Low-income Individuals; People who are eligible for or receive public health benefits; People who do not have third-party health coverage or have inadequate third-party health coverage

The Applicant does not systematically track and report on the income of the patient populations that utilize their services, and this data is not available through public sources. The Independent Entity has used data on patients' insurance coverage as a proxy for the number of low-income people served. There was a notably higher percentage of individuals with public coverage and with no health insurance coverage reported than in the service area generally.

Health Insurance Coverage

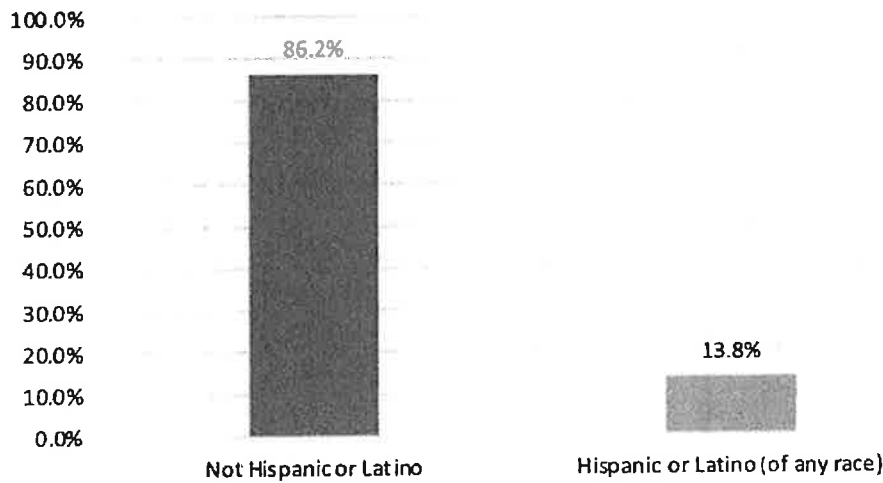

Racial and Ethnic Minorities

The graphs below summarize the ethnic and racial demographics of the patient population served by the Applicant. The Applicant currently sees a lower proportion of White patients than is representative of the service area. Similarly, the number of Hispanic individuals seen is higher than is representative of the service area.

Race

Ethnicity

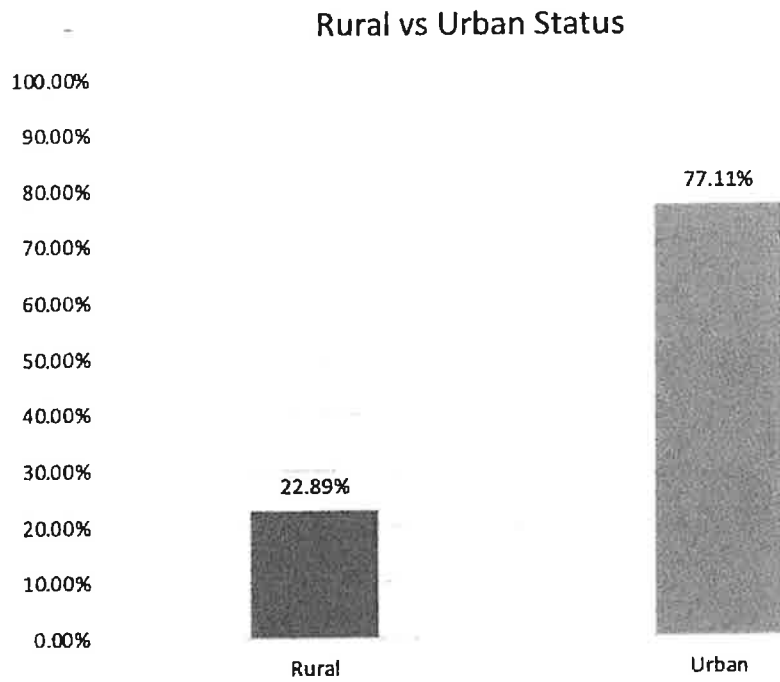

Immigrants

The Applicant does not systematically track and report on the immigrant status of the other patient populations that utilize their services, and this data is not available through public sources.

Rural Populations

The graph below summarizes the patient population by rural and urban status. The applicant serves a higher proportion of individuals from rural regions in the data compared to the statewide average.

For all medically underserved groups identified above who reside in southern Erie County and areas further south, this Project should increase their access to GI services. Stakeholder interviews, both with the Applicant and local referral sources, indicated that there exists a need for additional endoscopic services.

Access has been particularly constrained by the closure of Lakeshore Healthcare Center in 2020 and Dunkirk Memorial Hospital’s discontinuation of GI services in 2023⁹. This new Center will increase the availability of GI services, providing greater access to such services for the greater community and its medically underserved individuals.

8. Summarize the performance of the Applicant in meeting its obligations, if any, under Public Health Law § 2807-k (General Hospital Indigent Care Pool) and federal regulations requiring the provision of uncompensated care, community services, and/or access by minorities and people with disabilities to programs receiving federal financial assistance. Will these obligations be affected by implementation of the project? If yes, please describe.

N/A

9. Are there any physician and professional staffing issues related to the project or any anticipated staffing issues that might result from implementation of project? If yes, please describe.

All staff at the proposed Center will be newly hired. Planned staffing includes a director of nursing (1), registered nurses (9), front desk workers (3), endoscopy technicians (5), and a unit assistant (1).

Despite the challenge to recruit and retain staff in this area of upstate New York, the Applicant has expressed confidence in its ability to recruit and retain a strong complement of professionals.

10. Are there any civil rights access complaints against the Applicant? If yes, please describe.

No

11. Has the Applicant undertaken similar projects/work in the last five years? If yes, describe the outcomes and how medically underserved group(s) were impacted as a result of the project. Explain why the applicant requires another investment in a similar project after recent investments in the past.

No

STEP 2 – POTENTIAL IMPACTS

1. For each medically underserved group identified in Step 1 Question 2, describe how the project will:
 - a. Improve access to services and health care
 - b. Improve health equity
 - c. Reduce health disparities

The applicant provides colonoscopies, a procedure that can prevent colon cancer and other GI diseases. This reduces the burden of disease on the historically underserved thereby reducing health disparities.

- **Low-Income People:** Low-income populations often face significant barriers to accessing specialized healthcare services due to cost and availability¹¹. Individuals with lower socio-economic status also have a higher incidence of colorectal cancer¹². An endoscopy center that offers affordable services can directly enhance access to crucial diagnostic and preventive care, reducing the long-term costs associated with late-stage disease treatment by detecting these diseases early. This group benefits from improved affordability and accessibility, addressing key elements of health equity¹³.
- **Racial and Ethnic Minorities:** Historical disparities in healthcare have disproportionately affected racial and ethnic minorities, leading to worse health outcomes in these groups. There are significant disparities in both colorectal cancer related incidence and mortality among racial and ethnic minorities with African Americans reported to have the highest incidence

and mortality rates¹⁴. By providing culturally competent care and ensuring that services are accessible and respectful of cultural needs, an endoscopy center can help bridge these gaps. Such centers can also focus on community outreach and education, which are essential for increasing awareness about the importance of early disease detection and preventive care¹⁵.

- **Immigrants:** Immigrants may face language barriers, lack of familiarity with the healthcare system, and fear of accessing services due to immigration status concerns. This has resulted in immigrant status being associated with lower likelihood of colorectal cancer screening¹⁶. An endoscopy center that offers multilingual services and operates under policies that protect all patients can significantly improve these individuals' ability to seek and receive care.
- **Older Adults:** Endoscopic services are traditionally utilized by individuals 40 years and older¹⁷. Older adults are at a higher risk for conditions like colorectal cancer, which makes access to endoscopy services crucial. The proximity of services can reduce the need for long-distance travel, which can be challenging for this group. Additionally, age-appropriate care and communication can improve their ability to engage with healthcare providers and follow through with recommended treatments.
- **Persons Living in Rural Areas:** Residents of rural areas often have limited access to specialized healthcare services. A new endoscopy center in or near these areas can dramatically reduce the travel time and inconvenience associated with obtaining necessary care, thus improving the availability and accommodation of services. This also helps in early detection and treatment of diseases, which can be lifesaving¹⁸.
- **People Who Are Eligible For or Receive Public Health Benefits:** Studies have indicated that individuals with Medicaid had higher mortality rates from colorectal cancer compared to patients with commercial insurance¹⁹. Medicaid recipients are often from lower socioeconomic background. These groups have higher rates of certain health conditions (including colorectal cancer) due to factors such as limited access to healthy food, higher rates of smoking, and less access to preventive care. Medicaid patients may experience delays in screening and diagnosis due

to various barriers such as fewer healthcare providers accepting Medicaid, longer wait times for appointments, and lower access to specialty care. Early detection of colorectal cancer through routine screenings like colonoscopies significantly reduces mortality, but delays in screening can lead to diagnosis at later, more dangerous stages of the disease.

- **People Who Do Not Have Third-Party Health Benefits Or Have Inadequate Third-Party Health Coverage:** For individuals without health insurance, cost is a significant barrier to accessing healthcare services. Studies have suggested that individuals with colorectal cancer who were uninsured had higher mortality rates than patients with commercial insurance²⁰. An endoscopy center providing services at a reduced cost or on a sliding scale can make life-saving diagnostic and preventive care accessible to uninsured populations. This directly addresses affordability and helps in reducing health disparities by ensuring that financial constraints do not prevent individuals from receiving early and appropriate care.

2. For each medically underserved group identified in Step 1 Question 2, describe any unintended positive and/or negative impacts to health equity that might occur as a result of the project.

The intended benefit of this project, described above, is to increase access to GI services.

By providing specialized medical services such as endoscopy closer to rural communities, residents perceive a genuine commitment to their health needs. Consistent and reliable care helps build trust over time. This direct investment in local healthcare infrastructure demonstrates that their well-being is a priority, which can build trust between healthcare providers and the community. Additionally, building trust in healthcare communities is essential for ensuring patients feel comfortable seeking care, adhering to treatment plans, and engaging with healthcare providers.

3. How will the amount of indigent care, both free and below cost, change (if at all) if the project is implemented? Include the current amount of indigent care, both free and below cost, provided by the Applicant.

It is anticipated that the proportion of indigent care at the new site in southern Erie County will be similar to the proportion of indigent care provided at the existing site.

Indigent Care Funding (Individuals they are not Billing)	Year	Proportion of Individuals Served	Indigent Care Funding
Bad Debt	2023	81%	\$10,927.14
Bankrupt	2023	1%	\$4,302.72
Courtesy Discount	2023	6%	\$3,280.42
Uncompensated Care	2023	12%	\$3,194.00

4. Describe the access by public or private transportation, including Applicant-sponsored transportation services, to the Applicant's service(s) or care if the project is implemented.

Patients need a responsible driver when traveling to and from the Center due to the pre-procedure preparation and the post-procedure effects of the anesthesia. There is a lack of accessible public transportation (such as bus routes); however, during internal interviews, the Applicant and stakeholders shared that most individuals in the community served have cars. The Center will work with patients who lack a responsible driver to obtain transportation through local providers. Medicaid patients have access to Ambulette services to provide safe transportation for their scheduled procedure. Patients can also take a ride share service, like Uber, when they have a responsible person with them to and from the Center.

5. Describe the extent to which implementation of the project will reduce architectural barriers for people with mobility impairments.

The Center will be compliant with the Americans with Disabilities Act.

Meaningful Engagement

1. List the local health department(s) located within the service area that will be impacted by the project.

Erie County Department of Health

2. Did the local health department(s) provide information for, or partner with, the Independent Entity for the HEIA of this project?

Yes, the local health department provided information for this project. Additionally, the local health department refers patients to the Applicant for services.

3. **Meaningful engagement of stakeholders: Complete the “Meaningful Engagement” table in the document titled “HEIA Data Table”. Refer to the Instructions for more guidance.**

Please refer to the completed excel file titled “HEIA Data Tables_ECWNY.xlsx”.

Interviews with Key Stakeholders for the Center proposal was conducted through seven 30-to-60-minute interviews over zoom or telephone.

4. **Based on your findings and expertise, which stakeholders are most affected by the project? Has any group(s) representing these stakeholders expressed concern the project or offered relevant input?**

Aside from individuals needing GI services, the stakeholders primarily affected are primary care providers (or other healthcare entities) seeking to refer their patients for GI services. The Independent Entity interviewed four of these stakeholders. The Erie County Department of Health provides primary care to many of the county's uninsured patients and regularly refers such patients to the Applicant for GI services. The David Kowalski Family Practice and the East Aurora Family Practice are primary care practices that are key referrals sources for the Applicant. In addition, Arab American Community Center for Economic and Social Services (ACCESS) of Western New York was very supportive of the new center. All four stakeholders strongly supported this Project and the increased GI access it would provide.

5. **How has the Independent Entity’s engagement of community members informed the Health Equity Impact Assessment about who will benefit as well as who will be burdened from the project?**

The stakeholder engagement confirmed two key aspects of the HEIA. First, each conversation supported the Applicant’s assessment that the region had a need for greater access to GI services. Second, the conversations confirmed that the Applicant has a good reputation for providing GI services to medically underserved populations. By way of example, the Erie County Department of Health affirmed that it values its partnership with the Applicant in ensuring access to care to local uninsured patients. The two interviewed physician practices concurred with this. Throughout the interviews, none of the stakeholders identified a medically underserved group that would be negatively impacted by the Project.

6. **Did any relevant stakeholders, especially those considered medically underserved, not participate in the meaningful engagement portion of the Health Equity Impact Assessment? If so, list.**

No.

DSTEP 3 – MITIGATION

1. If the project is implemented, how does the Applicant plan to foster effective communication about the resulting impact(s) to service or care availability to the following:
 - a. People of limited English-speaking ability
 - b. People with speech, hearing or visual impairments
 - c. If the Applicant does not have plans to foster effective communication, what does the Independent Entity advise?

The Applicant has language supports for non-English speaking patients. For non-English speaking patients, the Applicant posts information regarding the availability of free language assistance services in multiple languages. Pacific Interpreters Language Line is the vendor.

For the visually impaired, the Applicant provides wayfinding that is ADA compliant. Policies and procedures are in place which allow for a service animal and for advocates to be present and assist the patient.

For the hearing impaired, the Applicant utilizes a language service that offers American Sign Language (ASL) services.

2. **What specific changes are suggested so the project better meets the needs of each medically underserved group (identified above)?**

To better meet the needs of each medically underserved group, the Applicant should implement a series of proactive and continuous communication channels with the community. Additionally, offering educational workshops or seminars on overall colon health and cancer prevention. The dialogue channels should allow for regular feedback and discussions about health needs and services. Each communication strategy should be crafted to fit individual medically underserved groups.

3. **How can the Applicant engage and consult impacted stakeholders on forthcoming changes to the project?**

To further enhance the engagement and consultation process with impacted stakeholders on forthcoming changes to the project, the Applicant can adopt a more structured and proactive approach to communicating updates (such as staffing changes or changes in hours) occurring at the Center once operational.

4. **How does the project address systemic barriers to equitable access to services or care? If it does not, how can the project be modified?**

The Project has begun addressing systemic barriers to equitable access by generally increasing access to specialty care in a geographic area where such

access is limited. In addition, the Applicant has a prior history and commitment of providing such care to medically underserved communities. The ongoing outreach and engagement with these groups during the Project's construction and go-live process could further address such barriers by maximizing the number of such people accessing services at the Center.

STEP 4 – MONITORING

- 1. What are existing mechanisms and measures the Applicant already has in place that can be leveraged to monitor the potential impacts of the project?**

The Applicant has robust systems in place to monitor potential impacts of the project. The Applicant employs the Gastroenterology Quality Improvement Consortium (GIQuIC), which provides continuous enhancement of provider performance. This system tracks and analyzes various quality metrics (such as patient wait times, patient safety and quality control, documentation and compliance, and clinical management and treatment protocols), offering a dynamic platform for assessing the effectiveness of new practices or procedures introduced by the project.

Stakeholder interviews indicated that the applicant consistently achieves favorable outcomes on Press Ganey surveys, a tool that gathers and evaluates patient feedback. These scores reflect high patient satisfaction and can serve as a crucial indicator of the project's impact on patient experience and engagement.

Together, these tools provide a comprehensive framework for monitoring both the clinical and patient-centered outcomes of the project, ensuring any shifts in performance are promptly identified and addressed. Both tools involve health equity measures as they track patients' demographic information.

- 2. What new mechanisms or measures can be created or put in place by the Applicant to ensure that the Applicant addresses the findings of the HEIA?**

To ensure that the Applicant effectively addresses the findings of this HEIA, several new mechanisms and measures can be established. The Applicant can design and implement targeted programs that are specifically tailored to meet the unique needs of underserved populations.

Increasing outreach efforts is crucial. The Applicant should initiate comprehensive outreach campaigns aimed at engaging underserved communities more actively, thereby fostering greater accessibility to healthcare services. These campaigns should include partnerships with local organizations.

The Applicant can establish a feedback loop with these communities to continually assess the effectiveness of the outreach and adapt strategies as necessary. This approach ensures that the services provided are relevant and responsive to these communities' needs and builds trust and encourages community participation in health programs.

STEP 5 – DISSEMINATION

The Applicant is required to publicly post the CON application and the HEIA on its website within one week of acknowledgement by the Department. The Department will also publicly post the CON application and the HEIA through NYSE-CON within one week of the filing.

OPTIONAL: Is there anything else you would like to add about the health equity impact of this project that is not found in the above answers? (250 words max)

This center can significantly impact health equity within the community by making concerted efforts to identify and communicate more intentionally with underserved populations. Enhancing engagement with these groups can ensure that the services provided are accessible and tailored to meet their specific needs, thus improving overall health outcomes, and reducing disparities.

----- SECTION BELOW TO BE COMPLETED BY THE APPLICANT -----

SECTION C. ACKNOWLEDGEMENT AND MITIGATION PLAN

II. Mitigation Plan

If the project is approved, how has or will the Applicant mitigate any potential negative impacts to medically underserved groups identified in the Health Equity Impact Assessment? (1000 words max)

Please note: this narrative must be made available to the public and posted conspicuously on the Applicant's website until a decision on the application has been made.

Health Equity Impact Assessment Template

II. Mitigation Plan

If the **Endoscopy Center of Western New York, LLC (ECWNY)** receives approval to extend their Certificate of Need (CON) to an additional location (250 Windward Road, Suite 140, Orchard Park, NY 14127) ECWNY will use this location to communicate more intentionally with underserved populations.

Gastroenterology Associates, LLP, the medical practice associated with the physicians that perform procedures at ECWNY, are currently in talks with Catholic Health on a Health Equity project to perform screening colonoscopies on a back log of their Medicare patients. The patients in question reside in various communities surrounding both the current ECWNY location and the proposed location. Both centers would be used to service the patients in question and if the project is successful, Catholic Health may be interested in the centers servicing other patient groups that may not be receiving or have appropriate access to gastroenterology specialty services.

In addition, ECWNY believes that if the additional location is approved, it could be of service to existing patients of Neighborhood Health Center located in Blasdell, NY. Neighborhood Health Center is an inclusive and welcoming healthcare organization (non-for-profit) that services individuals regardless of insurance status or ability to pay. This center is located 3.7 miles away from ECWNY's proposed location.

In addition, the proposed location is between Route 90 and Route 219 which provide easy access from both underserved urban areas such as Lackawanna and underserved rural areas to the south (Southern Tier) extending into Northern Pennsylvania. This underserved rural area is home to the Seneca Nation of Indians (Cattaraugus, Allegany and Oil Springs Reservations).

The current ECWNY location has serviced patients from Neighborhood Health Center, individuals from Lackawanna, the Southern Tier, and the Seneca Nation of Indians. We expect these patient populations to increase based on the proximity to the new office.

Furthermore, through the HEIA process, a physician owner of ECWNY (who is a Muslim leader in an Amherst NY Mosque) reached out to cultural leaders in the City of Lackawanna and made a connection with Access of WNY, a non-for-profit community organization representing approximately six-thousand Yemeni and other Arab immigrants. It was determined that Access of WNY has a need and ability to educate their members with respect to colon cancer and the importance of cancer screening and treatment of other gastrointestinal issues.

ECWNY plans on establishing relationships and programs to service these underserved populations.

Part IV.	Storm and Flood Mitigation				
	Definitions of FEMA Flood Zone Designations				
	Flood zones are geographic areas that the FEMA has defined according to varying levels of flood risk. These zones are depicted on a community's Flood Insurance Rate Map (FIRM) or Flood Hazard Boundary Map. Each zone reflects the severity or type of flooding in the area.				
	Please use the FEMA Flood Designations scale below as a guide to answering all Part IV questions regardless of project location, flood and or evacuation zone.			Yes	No
4.1	Is the proposed site located in a flood plain? If Yes, indicate classification below and provide the Elevation Certificate (FEMA Flood Insurance).			<input type="checkbox"/>	<input checked="" type="checkbox"/>
	Moderate to Low Risk Area			Yes	No
	Zone	Description		<input type="checkbox"/>	<input checked="" type="checkbox"/>
	In communities that participate in the NFIP, flood insurance is available to all property owners and renters in these zones:				
	B and X	Area of moderate flood hazard, usually the area between the limits of the 100-year and 500-year floods. Are also used to designate base floodplains of lesser hazards, such as areas protected by levees from 100-year flood, or shallow flooding areas with average depths of less than one foot or drainage areas less than 1 square mile.		<input type="checkbox"/>	

C and X	Area of minimal flood hazard, usually depicted on FIRMs as above the 500-year flood level.	<input type="checkbox"/>	
High Risk Areas		Yes	No
Zone	Description	<input type="checkbox"/>	<input checked="" type="checkbox"/>
In communities that participate in the NFIP, mandatory flood insurance purchase requirements apply to all these zones:			
A	Areas with a 1% annual chance of flooding and a 26% chance of flooding over the life of a 30-year mortgage. Because detailed analyses are not performed for such areas; no depths or base flood elevations are shown within these zones.	<input type="checkbox"/>	
AE	The base floodplain where base flood elevations are provided. AE Zones are now used on new format FIRMs instead of A1-A30.	<input type="checkbox"/>	
A1-30	These are known as numbered A Zones (e.g., A7 or A14). This is the base floodplain where the FIRM shows a BFE (old format).	<input type="checkbox"/>	
AH	Areas with a 1% annual chance of shallow flooding, usually in the form of a pond, with an average depth ranging from 1 to 3 feet. These areas have a 26% chance of flooding over the life of a 30-year mortgage. Base flood elevations derived from detailed analyses are shown at selected intervals within these zones.	<input type="checkbox"/>	
AO	River or stream flood hazard areas, and areas with a 1% or greater chance of shallow flooding each year, usually in the form of sheet flow, with an average depth ranging from 1 to 3 feet. These areas have a 26% chance of flooding over the life of a 30-year mortgage. Average flood depths derived from detailed analyses are shown within these zones.	<input type="checkbox"/>	
AR	Areas with a temporarily increased flood risk due to the building or restoration of a flood control system (such as a levee or a dam). Mandatory flood insurance purchase requirements will apply, but rates will not exceed the rates for unnumbered A zones if the structure is built or restored in compliance with Zone AR floodplain management regulations.	<input type="checkbox"/>	
A99	Areas with a 1% annual chance of flooding that will be protected by a Federal flood control system where construction has reached specified legal requirements. No depths or base flood elevations are shown within these zones.	<input type="checkbox"/>	
High Risk Coastal Area		Yes	No
Zone	Description		
In communities that participate in the NFIP, mandatory flood insurance purchase requirements apply to all these zones:			
Zone V	Coastal areas with a 1% or greater chance of flooding and an additional hazard associated with storm waves. These areas have a 26% chance of flooding over the life of a 30-year mortgage. No base flood elevations are shown within these zones.	<input type="checkbox"/>	<input checked="" type="checkbox"/>
VE, V1 - 30	Coastal areas with a 1% or greater chance of flooding and an additional hazard associated with storm waves. These areas have a 26% chance of flooding over the life of a 30-year mortgage. Base flood elevations derived from detailed analyses are shown at selected intervals within these zones.	<input type="checkbox"/>	
Undetermined Risk Area		Yes	No
Zone	Description	<input type="checkbox"/>	<input checked="" type="checkbox"/>

	D	Areas with possible but undetermined flood hazards. No flood hazard analysis has been conducted. Flood insurance rates are commensurate with the uncertainty of the flood risk.		
4.2	Are you in a designated evacuation zone?		<input type="checkbox"/>	<input checked="" type="checkbox"/>
	If Yes, the Elevation Certificate (FEMA Flood Insurance) shall be submitted with the application.			
	If yes which zone is the site located in?			
4.3	Does this project reflect the post Hurricane Lee, and or Irene, and Superstorm Sandy mitigation standards?		<input type="checkbox"/>	<input checked="" type="checkbox"/>
	If Yes, which floodplain?	100 Year	<input type="checkbox"/>	
		500 Year	<input type="checkbox"/>	

The Elevation Certificate provides a way for a community to document compliance with the community's floodplain management ordinance.

The project narrative should describe existing primary care services in the proposed service area. The narrative should include the number and location of existing D&TCs, extension clinics and part-time clinics and a summary of primary care services available through private practices. The narrative should indicate whether travel time and transportation are factors in access to primary care. Examples of travel related issues include topography, seasonal weather conditions, and availability of public transportation. Applicants are not expected to describe the volume of services delivered by existing providers, since they will rarely have access to such data, but the project narrative should indicate that the applicant is reasonably familiar with the overall availability of primary care in the targeted area.

In instances where the target area is likely to already have significant primary care resources, the CON proposal will be reviewed for the following need related factors:

- The ratio of primary care physicians to population in the proposed service area. HPSA uses a ratio of 1.0 FTE physicians to 3000 persons; Medicaid Managed Care uses a ratio of 1 to 1500.
- The number of primary care physicians in the proposed service area who are "active" in serving the Medicaid population. This is often measured as physicians who are reimbursed \$5000 or more per year by Medicaid.
- The annual number of primary care visits per person by Medicaid eligible persons in the proposed service area. An average lower than 2.0 visits per person is often considered a problem.
- The percentage of the Medicaid population that is enrolled in Managed care will be taken into account where appropriate.
- The current volume of primary care visits to existing D&TC and Extension clinics.

Not all of the above criteria need be evaluated for all applications. The number will vary depending on the type and location of services proposed and on how thoroughly the application addresses need in the project narrative and the related schedules.

Need Review for Specialty Clinics:

Applications not involving primary care services must also provide a written analysis that clearly demonstrates that the need exists for the proposed services

4. Is the proposed clinic in an underserved area as indicated by location in a Health Professional Shortage Area (HPSA) or Medically Underserved Area (MUA)?

The Center and the proposed extension clinic are not located in a Health Professional Shortage Area (HPSA) or a Medically Underserved Area (MUA).

6. In the case of Dental clinics, is the application supported by the local Health Department? Is the proposal supported by the Department of Health's Bureau of Dental Services? Is the applicant participating in current dental health initiatives? Has the applicant consulted with resources such as the New York State Oral Health Technical Assistance Center?

All Chronic Dialysis applicants must provide information requested on the following page in compliance with 10 NYCRR 670.6.

END STAGE RENAL DISEASE NOT APPLICABLE

1. Provide a five-year analysis of projected costs and revenues that demonstrates that the proposed dialysis services will be utilized sufficiently to be financially feasible.

2. Provide evidence that the proposed dialysis services will enhance access to dialysis by patients, including members of medically underserved groups which have traditionally experienced difficulties obtaining access to health care, such as; racial and ethnic minorities, women, disabled persons , and residents of remote rural areas.

3. Provide evidence that the hours of operation and admission policy of the facility will promote the availability of dialysis at times preferred by the patients, particularly to enable patients to continue employment.

4. Provide evidence that the facility is willing to and capable of safely serving patients.

5. Provide evidence that the proposed facility will not jeopardize the quality of care or the financial viability of existing dialysis facilities. This evidence should be derived from analysis of factors including, but not necessarily limited to current and projected referral and use patterns of both the proposed facility and existing facilities. A finding that the proposed facility will jeopardize the financial viability of one or more existing facilities will not of itself require a recommendation to of disapproval.
